

InterMedia XD Design Walkthrough

This is an introduction to the Adobe XD design of the InterMedia app used to catalog your personal collection of books, music, and movies. This app is available for mobile, tablet, and smartwatches. InterMedia gives you the ability to create a profile, search items in the database via text or a barcode scanner, and add items to your collection. You will also have the option to submit items to the database to help expand the InterMedia library for other users.

Mobile/Tablet Design

Sign In/Sign Up

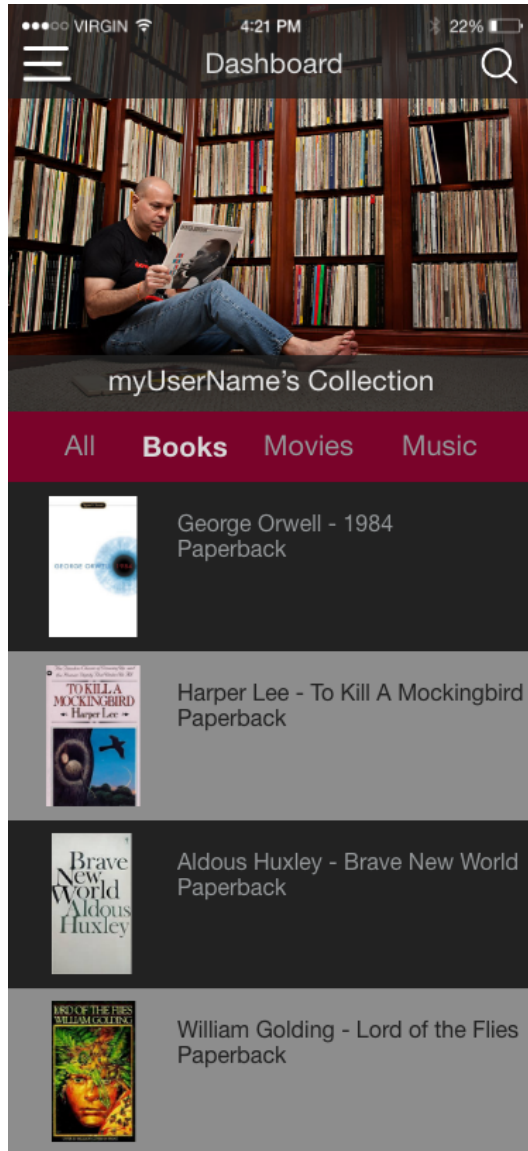

The mobile and tablet design offer the full range of options to the user. You will begin with a Sign In page where registered users can enter their username and password to login to the app. New users will have the option of clicking a link to Sign Up for an account.

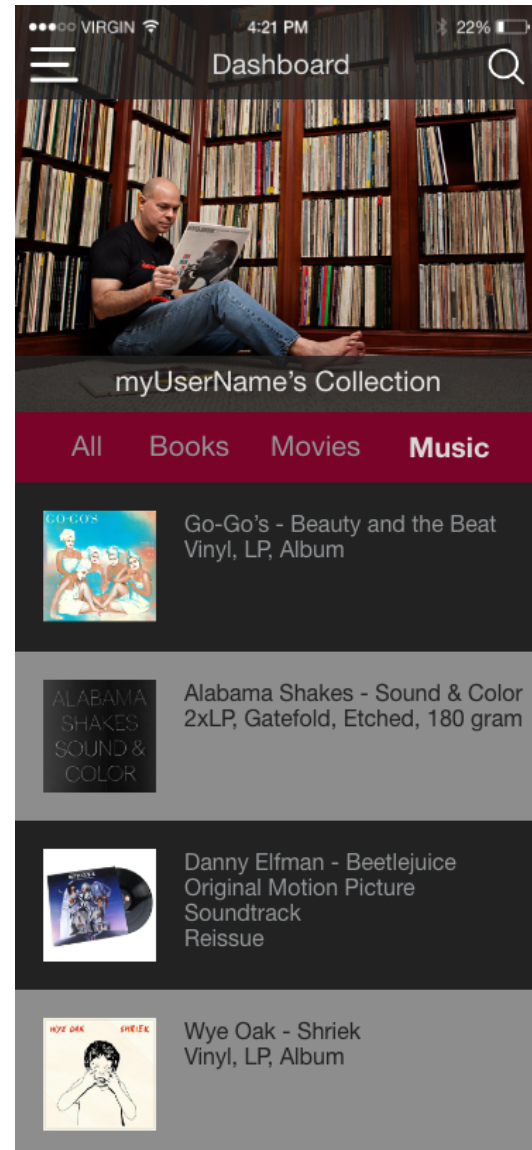

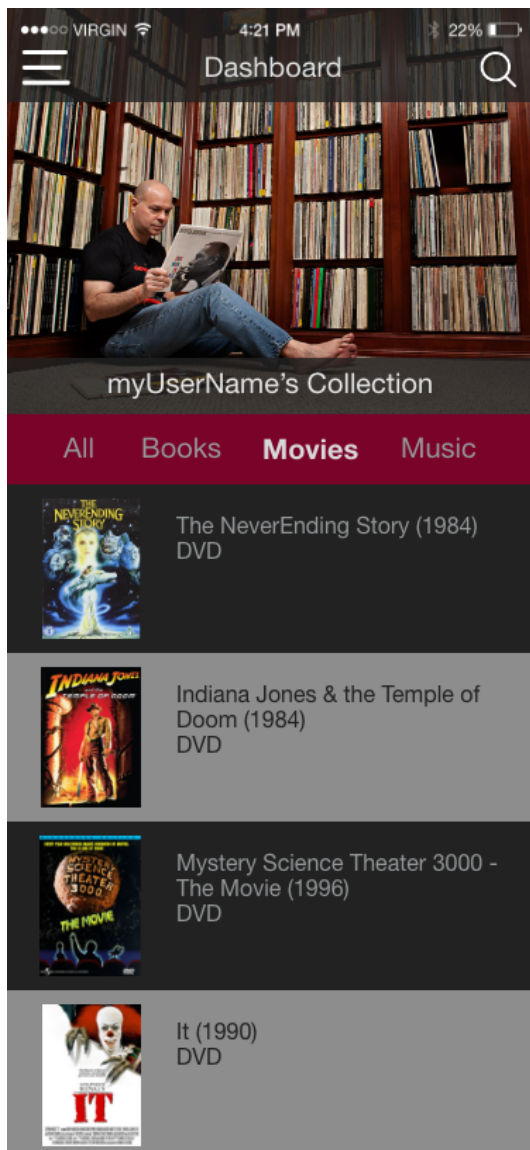

Users of the InterMedia app need to be signed in because everything will run off of their unique profile. There is also an option on the Sign In page to share the app through Facebook, Twitter, and Google +. The Sign Up page has a back arrow at the top left in case the user does not need to sign up and would like to return to the Sign In page. Both pages will take the users to the Dashboard page upon submitting the user info.

Dashboard/Books/Movies/Music

Upon sign in/sign up, the user is taken to the Dashboard, which is the main page of the app. The Dashboard, Books, Movies, and Music pages all have a similar layout. This is where the user will be able to browse through their collections. The Dashboard page will hold the entire collection while the other three pages will hold the different types of media's collections.

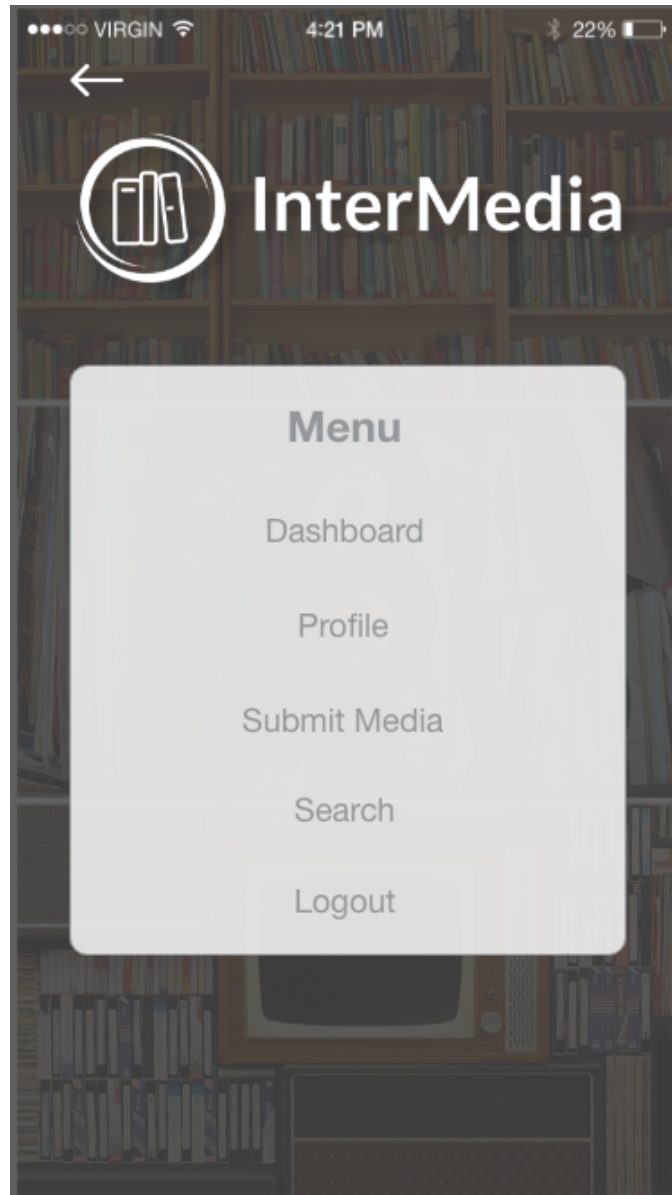

These pages allow the user to scroll through the items in their collection and click on an item to view it's details. On the top of the page there is a menu icon on the left, sending users to a navigation page, and a search icon on the right that will take users to a search page. The Dashboard, Books, Movies, and Music pages all have a menu to navigate between the four pages, allowing users to view their entire collection or just the selected media types.

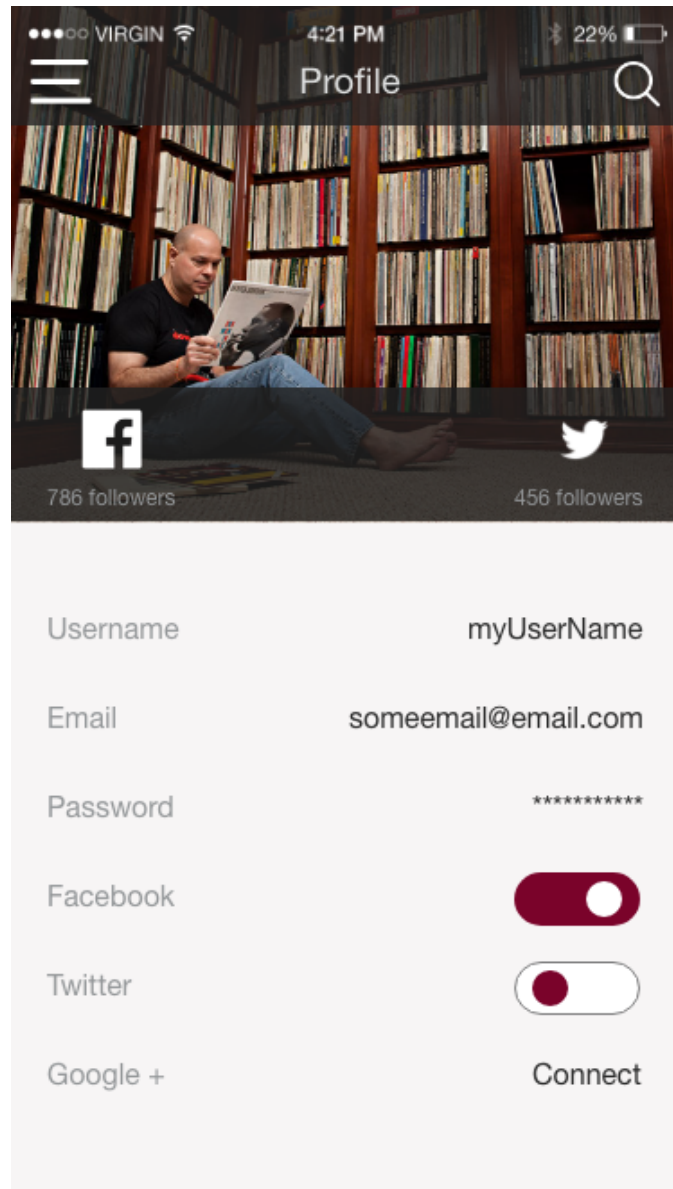

Navigation

The hamburger menu icon in the top left of all of the screens takes users to the navigation page. This will allow users to quickly switch to the dashboard, profile page, submission page, or search page. The navigation screen also allows users to logout of their account and return to the Sign In page. To exit the navigation page, users can click on the arrow in the top left corner.

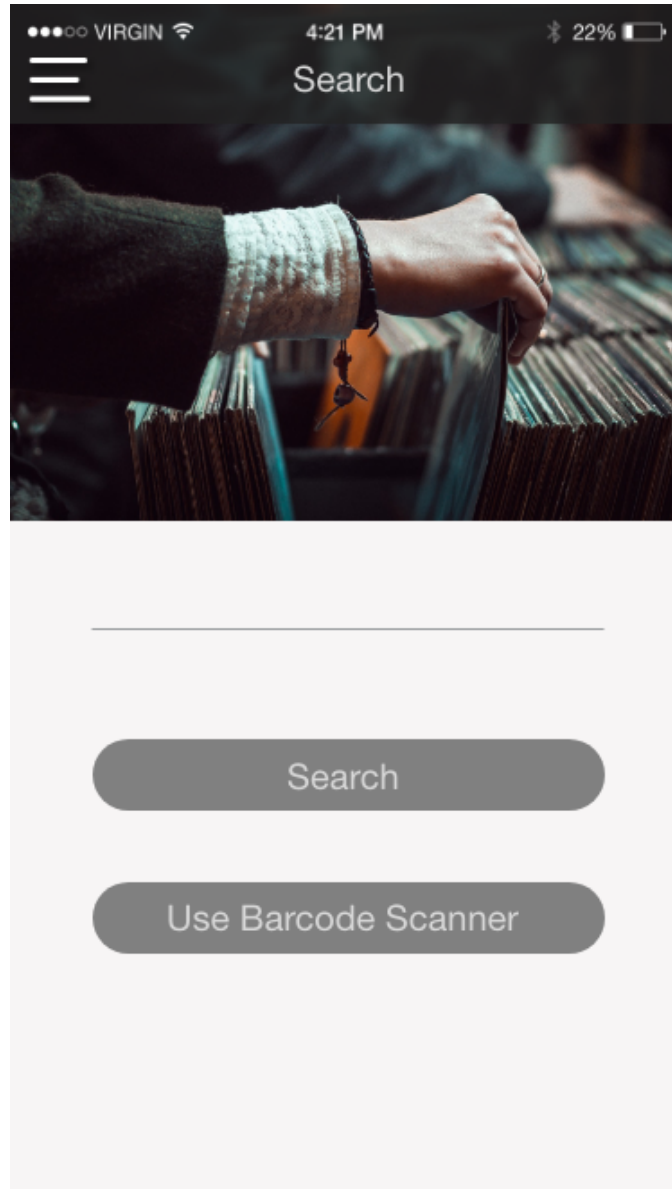

Profile

The profile page contains information about the user. Here you can change your profile photo, update information, and link social media accounts. Users also have access to the navigation menu and search page through the icons at the top of the page.

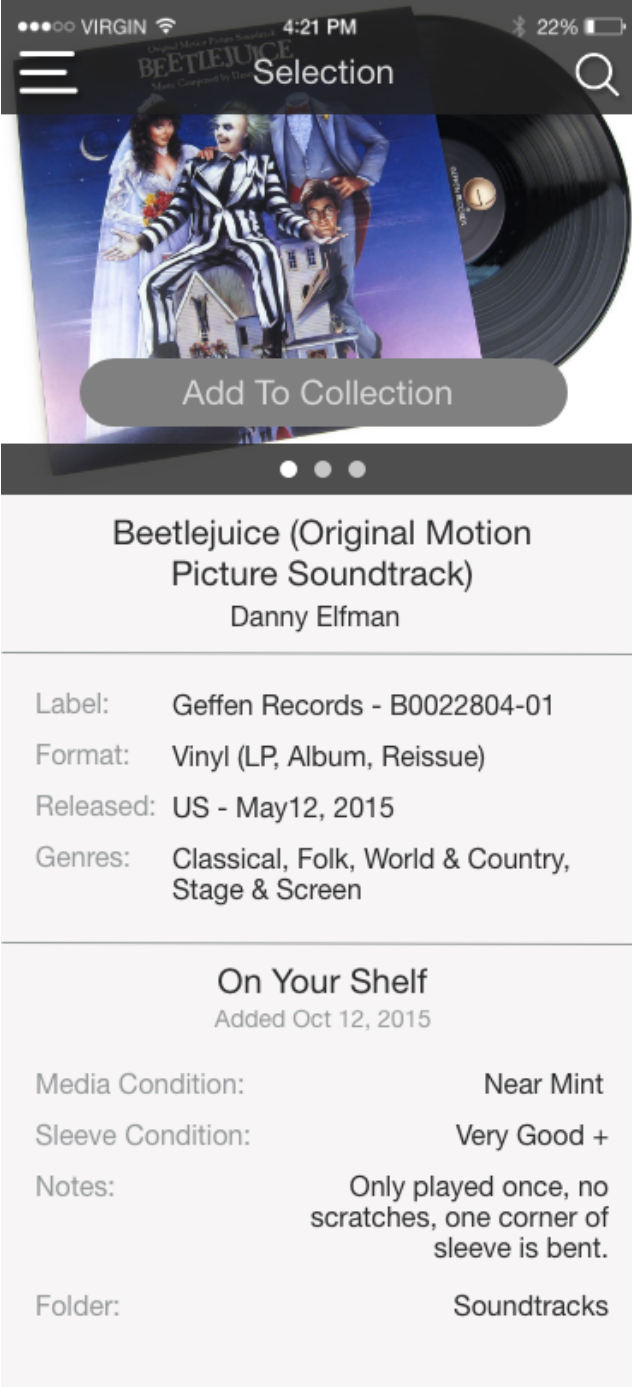

Search

The search page gives users the ability to search for items in the database with text input or a barcode scanner. From here, the user will be taken to the selection page for whatever item they searched for.

Selection

From the search page or by selecting an item in the dashboard, books, movies, or music page, the user is taken to the selection page. Here you can view all of the information listed for the selected item. Multiple photos may be available to view of the item. You will also have the option to add the item to your collection. If it is already in your collection, information about that will be listed under the item specifics.

Selection

Add To Collection

Beetlejuice (Original Motion Picture Soundtrack)
Danny Elfman

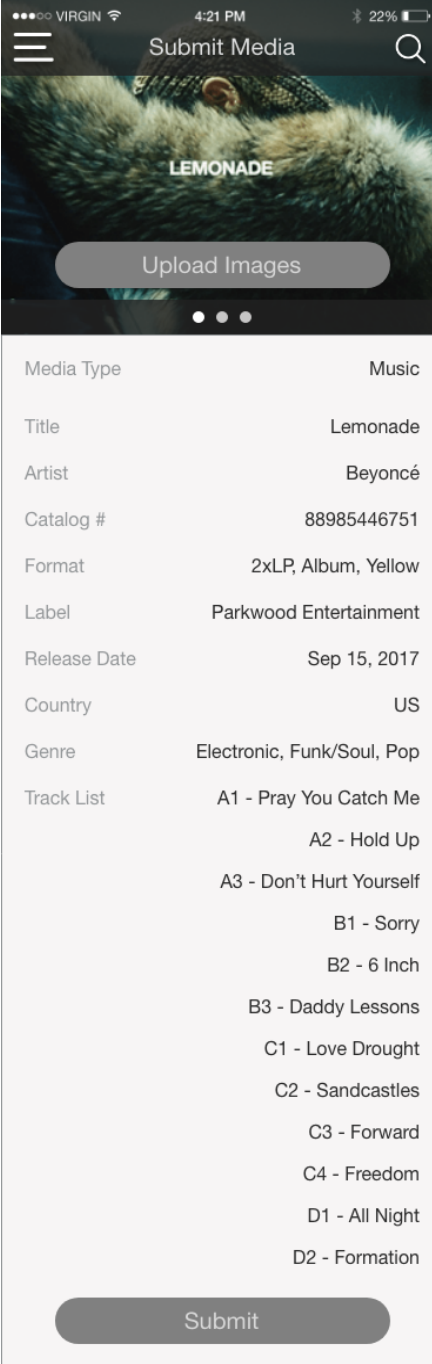

Label: Geffen Records - B0022804-01
Format: Vinyl (LP, Album, Reissue)
Released: US - May12, 2015

On Your Shelf
Added Oct 12, 2015

Media Condition: Near Mint
Sleeve Condition: Very Good +
Notes: Only played once, no scratches, one corner of sleeve is bent.
Folder: Soundtracks

Submit Media

On this page, users will have the ability to submit an item to the database. You can upload multiple images and list the information for the selection. Users will have the capability to help build the community database.

The screenshot shows a mobile application interface for submitting media. At the top, the status bar shows 'VIRGIN' carrier, 4:21 PM, and 22% battery. The app header is 'Submit Media' with a menu icon on the left and a search icon on the right. Below the header is a large image of Beyoncé's 'Lemonade' album cover with the word 'LEMONADE' overlaid. A button labeled 'Upload Images' is positioned over the bottom of the image. Below the image is a horizontal indicator with three dots, the second of which is filled. The main form area contains a table with the following data:

Media Type	Music
Title	Lemonade
Artist	Beyoncé
Catalog #	88985446751
Format	2xLP, Album, Yellow
Label	Parkwood Entertainment
Release Date	Sep 15, 2017
Country	US
Genre	Electronic, Funk/Soul, Pop
Track List	A1 - Pray You Catch Me A2 - Hold Up A3 - Don't Hurt Yourself B1 - Sorry B2 - 6 Inch B3 - Daddy Lessons C1 - Love Drought C2 - Sandcastles C3 - Forward C4 - Freedom D1 - All Night D2 - Formation

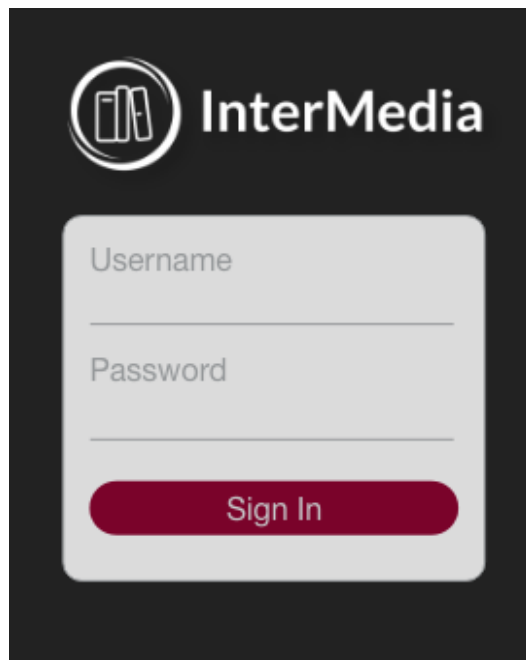

At the bottom of the form is a button labeled 'Submit'.

Smartwatch

The smartwatch design is a little more limited in its abilities because of the smaller screen size. Users will be able to sign in and view their dashboard, books, movies, and music in their collection. The search, submit, profile, and individual selections screens are not available for the smartwatch version.

Sign In

The sign in screen allows users to sign in to their accounts. The Sign Up page will not be available for the smartwatch. If guests would like to sign up for an account, they must do so on a tablet or mobile device. The screen for signing in is similar to the mobile and tablet versions featuring inputs for both the username and password.

A mockup of a smartwatch sign-in screen. The background is dark gray. At the top left is a circular logo containing a stylized book icon. To the right of the logo is the text "InterMedia" in a white, sans-serif font. Below the logo and text is a light gray rounded rectangle containing the sign-in form. The form has two input fields: the top one is labeled "Username" and the bottom one is labeled "Password", both in a light gray font. Below the password field is a red rounded rectangle button with the text "Sign In" in white.

Dashboard/Books/Movies/Music

Upon signing in, just like the mobile and tablet versions, users will be taken to their dashboard containing all of the items in their collection. Users will be able to scroll up and down through the individual items. The Books, Movies, and Music pages all have a similar layout and navigation. To navigate between the pages, users can click on the menu button in the top left of the screen to go to the Navigation page.

Movies

The NeverEnding Story
(1984)
DVD

Indiana Jones & the
Temple of Doom (1984)
DVD

Mystery Science Theater
3000 - The Movie (1996)

& Color
2xLP, Gatefold, Etched,
180 gram

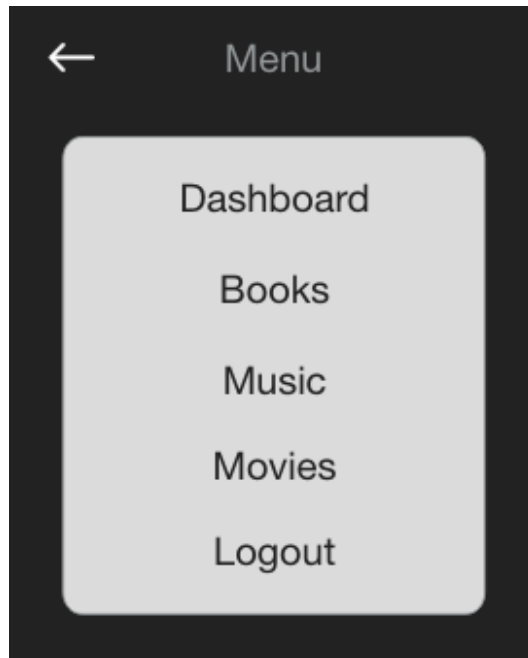

Danny Elfman -
Beetlejuice Original
Motion Picture
Soundtrack
Reissue

Wye Oak - Shriek
Vinyl, LP, Album

Navigation

The navigation page on the smartwatch version contains links to the Dashboard, Books, Movies, Music, and Logout which will take users back to the Sign In page. To exit the navigation page, users can click the left arrow location in the top left corner. This will bring users back to the Dashboard.

Conclusion

The goal of InterMedia is to create a collaborative community of individuals who can contribute to the ever-growing database of different types of media. Expanding on the concept of other data storage apps, the InterMedia app allows users to catalog their entire collection in one place. Regardless if you are just starting your collection or you are a seasoned veteran, you can benefit from the features of InterMedia.
